2. Garment Silhouette & Fit Types

- Slim Fit: Tailored close to the chest, waist, and arms without restricting movement. Ideal for athletic silhouettes or formal layering.
- Regular Fit: Our classic balanced cut with moderate ease through the chest, shoulders, and waist. Conforms to standard true-to-size dimensions.
- Relaxed Fit: Cut with additional room through the torso and hem for casual drape and breathability.
- Oversized Boxy Fit: Intentionally cut with dropped shoulders, wider sleeves, and generous chest dimensions for modern streetwear aesthetics.

3. How to Measure Yourself Correctly

To achieve optimal fit, use a flexible tailor's tape measure while standing naturally in lightweight clothing:

- Chest / Bust: Measure around the fullest circumference of your chest, keeping the tape level under your armpits and across your shoulder blades.
- Natural Waist: Measure around the narrowest point of your torso, typically one inch above the belly button.
- Hips: Measure around the fullest point of your hips and seat while standing with feet together.

FIT RECOMMENDATION BOUNDARY: If customer measurements fall between two sizes, recommend sizing DOWN for a fitted look or sizing UP for a relaxed drape. The chatbot must never guarantee 100% fit accuracy.

KNOWLEDGE BASE NOTICE & RETRIEVAL BOUNDARIES: This document is an authoritative policy reference intended for grounding our store AI/RAG assistant. Store policies, shipping charges, return periods, and operational terms are governed by active store settings. Dynamic customer data—including live product prices, real-time variant inventory, order shipment tracking, user profile addresses, and coupon code validity—must ALWAYS be resolved via live PostgreSQL application database APIs rather than static document text. If information is not covered within this knowledge base, the chatbot must clearly state that the information is unavailable and offer customer support assistance.
