

13. CUSTOMER SUPPORT OPERATIONS, SLAS & ESCALATION PROTOCOL

DOCUMENT ID: KB-DOC-013	VERSION: 1.0	STATUS: ACTIVE
CATEGORY: SUPPORT	EFFECTIVE: October 2026	LANGUAGE: English (EN)
OWNER: Store Policy & Operations Governance	CLASSIFICATION: Authoritative Public Policy	GROUNDING: Strict RAG Retrieval

1. Customer Support Channels & Response Times

At [STORE_NAME], we take pride in prompt, respectful, and accountable customer care. Our support infrastructure provides multiple escalation tiers:

- Tier 1 - AI Store Assistant (24/7): Immediate automated answers for store policies, size guidance, and catalog search.
- Tier 2 - Human Support Live Reply: Administrators and support staff can review and reply directly into your live chat session.
- Tier 3 - Email Support Desk: Contact [SUPPORT_EMAIL] for formal order inquiries, billing reconciliations, and return approvals. Responses are delivered within [EMAIL_RESPONSE_HOURS] business hours.
- Tier 4 - Telephone Support: Call [SUPPORT_PHONE] during active support operating hours ([SUPPORT_HOURS]).

2. Issue Escalation & Resolution Workflows

- Damaged or Defective Items: Report damaged items within 48 hours of delivery to [SUPPORT_EMAIL] with clear photos. We will arrange immediate complimentary doorstep replacement.
- Missing Items in Shipment: Notify support within 48 hours. Our warehouse security footage and carrier package weight logs will be audited to dispatch missing items promptly.
- Disputed Delivery Scenarios: If courier status marks 'Delivered' but you have not received your package, notify us within 24 hours to initiate a formal carrier geo-coordinate audit.

KNOWLEDGE BASE NOTICE & RETRIEVAL BOUNDARIES: This document is an authoritative policy reference intended for grounding our store AI/RAG assistant. Store policies, shipping charges, return periods, and operational terms are governed by active store settings. Dynamic customer data—including live product prices, real-time variant inventory, order shipment tracking, user profile addresses, and coupon code validity—must ALWAYS be resolved via live PostgreSQL application database APIs rather than static document text. If information is not covered within this knowledge base, the chatbot must clearly state that the information is unavailable and offer customer support assistance.
