

07. ORDER LIFECYCLE, TRACKING & CANCELLATION PROCEDURES

DOCUMENT ID: KB-DOC-007	VERSION: 1.0	STATUS: ACTIVE
CATEGORY: ORDERS	EFFECTIVE: October 2026	LANGUAGE: English (EN)
OWNER: Store Policy & Operations Governance	CLASSIFICATION: Authoritative Public Policy	GROUNDING: Strict RAG Retrieval

1. Order Lifecycle & Status Progression

Every customer order progresses through strict, validated transactional states:

Status Code	Status Description	Customer Action Permitted
PENDING	Order created, waiting for payment gateway confirmation	Complete payment or retry
CONFIRMED	Payment successful, order recorded in database	Eligible for immediate cancellation
PROCESSING	Inventory allocated at warehouse, invoice generated	Eligible for address modification
PACKED	Garments folded, bagged, and labeled for dispatch	Cancellation no longer permitted
SHIPPED	Handed over to courier; tracking AWB assigned	Track shipment via carrier link
OUT_FOR_DELIVERY	Courier agent assigned for final doorstep drop-off	Keep recipient phone reachable
DELIVERED	Package safely delivered to recipient	Eligible for return/exchange window
CANCELLED	Order successfully terminated prior to packing	Refund auto-initiated to payment source

2. Order Cancellation Policy

- Cancellation Window: Customers may cancel an order free of charge while in 'CONFIRMED' or 'PROCESSING' status prior to packing.
- Post-Dispatch Cancellations: Once an order has been marked 'PACKED' or 'SHIPPED', cancellation is no longer possible. Customers may reject doorstep delivery or initiate a standard return upon receipt.

3. Accessing Invoices & Order Receipts

Official digital tax invoices are accessible 24/7 under 'My Account' > 'Orders' by clicking 'Download Tax Invoice (PDF)'. A printed invoice copy is also enclosed within the exterior shipping sleeve of every physical delivery.

KNOWLEDGE BASE NOTICE & RETRIEVAL BOUNDARIES: This document is an authoritative policy reference intended for grounding our store AI/RAG assistant. Store policies, shipping charges, return periods, and operational terms are governed by active store settings. Dynamic customer data—including live product prices, real-time variant inventory, order shipment tracking, user profile addresses, and coupon code validity—must ALWAYS be resolved via live PostgreSQL application database APIs rather than static document text. If information is not covered within this knowledge base, the chatbot must clearly state that the information is unavailable and offer customer support assistance.
