

10. ACCOUNT MANAGEMENT, SECURITY & PROFILE GOVERNANCE

DOCUMENT ID: KB-DOC-010	VERSION: 1.0	STATUS: ACTIVE
CATEGORY: ACCOUNT	EFFECTIVE: October 2026	LANGUAGE: English (EN)
OWNER: Store Policy & Operations Governance	CLASSIFICATION: Authoritative Public Policy	GROUNDING: Strict RAG Retrieval

1. Customer Account Management

Creating an account at [STORE_NAME] unlocks express checkout, saved address management, permanent wishlist synchronization, and comprehensive order tracking history.

- Account Creation: Register using a valid email address and secure password. You will receive an instant account verification email.
- Password Reset: If you forget your password, click 'Forgot Password' on the login screen to receive a time-limited, encrypted reset link.
- Address Book: Manage multiple shipping and billing addresses under 'My Account' > 'Addresses' to expedite future checkouts.
- Permanent Wishlist: Save coveted garments by clicking the heart icon on any product page. Wishlist items remain synced across sessions.

2. Account Security & Privacy Governance

- Password Hashing: All user credentials are encrypted using industry-standard BCrypt hashing with dynamic salt. Staff cannot view passwords.
- Session Security: Customer login sessions utilize secure HTTP-only JWT bearer tokens with automatic timeout expiration.
- Account Deletion (Right to Erasure): To permanently delete your account and associated personal data, submit a request to [SUPPORT_EMAIL]. Active open orders must be delivered or refunded prior to account closure.

KNOWLEDGE BASE NOTICE & RETRIEVAL BOUNDARIES: This document is an authoritative policy reference intended for grounding our store AI/RAG assistant. Store policies, shipping charges, return periods, and operational terms are governed by active store settings. Dynamic customer data—including live product prices, real-time variant inventory, order shipment tracking, user profile addresses, and coupon code validity—must ALWAYS be resolved via live PostgreSQL application database APIs rather than static document text. If information is not covered within this knowledge base, the chatbot must clearly state that the information is unavailable and offer customer support assistance.
